Hi Lia,

I used exactly what is at svn (rev.2137), i.e.

- geometry: straws_skewed_blocks.geo
- momentum: 1.5 Gev
- theta: 0-180 deg
- phi : 0-360 deg
- magnetic field: SetField(0.,0.,20)
 SetFieldRegion(-150,150,-150,150,-250,250)
- nEvents: 1000
- TGeant3
- seed number: 12345 (like you wrote)

And, that's it.

As I mentioned, at gsi it works for me without any problem,
so maybe, indeed, you could not reproduce my problem,
but if you will try, would be nice, thanks.

Best wishes,
Ola.
