Hi Lia,

I used exactly what is at svn (rev.2137), i.e.

- geometry:     straws\_skewed\_blocks.geo
- momentum:     1.5 Gev
- theta:        0-180 deg
- phi :         0-360 deg
- magnetic field: SetField(0.,0.,20)  
                  SetFieldRegion(-150,150,-150,150,-250,250)
- nEvents:       1000
- TGeant3
- seed number:   12345 (like you wrote )

And, that's it.

As I mentioned, at gsi it works for me without any problem,  
so maybe, indeed, you could not reproduce my problem,  
but if you will try, would be nice, thanks.

Best wishes,  
Ola.
