Subject: Re: track finder Posted by asanchez on Tue, 05 Feb 2008 10:08:14 GMT View Forum Message <> Reply to Message

Dear all,

i have another question concerning the kalman fit implemented for tpc(genfit) and in stt(geane + kalman?).
Additionally to the fit parameters such as momentum, dip angle,...
Is it possible to access to the arc length(s) of the track (XY proyection) after the fit with the kalman algorithm?

If yes, i would to know how.

thanks in advance Alicia.
