
Subject: trajectories for particles with trackID > 0 missing

Dear developers,

I realized that in the latest version of pandaRoot only the trajectory of the first particle is stored in the root file if

```
fRun->SetStoreTraj(kTRUE);
```

is set.

I do not use any trajectory filters and I am pretty sure that it worked for older versions.

Has anyone else observed this behavior or knows the reason for this?

Ciao,

Tobias
