Hi all,

I'm trying to use these cluster properties to perform particle identification.

If I want to initialize a PndEmcXCIMoments object, root starts to complain and produces's an error with the following message:

Wrong call for PndEmcStructure. It should be instantiated first with TGeoManager

And this is how I'm using this function:

```
//Select cluster
```

```
PndEmcCluster* cl = (PndEmcCluster*) cluster_array->At(idWithHighestEnergy);
```

```
PndEmcXCIMoments zmom = cl->Xmoments();
```

```
.....
```

Any body, any idea, how to solve this?

Kind Wishes,

MB
