Hi all,

I have commited files for simulation and Hit production of Barrel Rpc_Tof.
I have used a simplified description of its geometry. It will be improved in the future in a correspondence with design studies.
If other type of Tof will be choosed at PANDA meeting in March, I will re-design of my implementation.

However, I could not commit files "pandaroot/CmakeLists.txt"
and "pandaroot/Dart.sh" with corresponding changes for Rpc_Tof.

It is needed to add in the file "pandaroot/CmakeLists.txt"
add_subdirectory (rpc)
and
ln -s $BUILDDIR/rpc/libRpc.so .
in the file "pandaroot/Dart.sh".

Please, who has access for change of these files make the changes and commit them.

Aida
