Hi,

I am using it also! So I can say the plugin for CMake is very useful if you would like to work this way. The following link explain in details how to do this:

[http://www.vtk.org/Wiki/CMake:Eclipse\\_UNIX\\_Tutorial](http://www.vtk.org/Wiki/CMake:Eclipse_UNIX_Tutorial)

and with the next release of cmake (2.6.0) one can use "Eclipse CDT4 Generator" from cmake to generate eclipse projects directly!

Mohammad
