Hi Spataro,

RPC installed by me is Barrel ToF detector too.
According to requirement to choose 3 letters for each detector,
Johan proposed me to use "rpc" instead "rpctof".

ToF installed by Alicia is scintillator detector.
I consider Multi Resistive Plate Chambers detector
for time of flight.
Now the geometry and hit production of RPC in Panda_Root
are very preliminary. I will include more detail geometry, hit
production, and also PID with RPC_s according to variance of
MRPC_ToF proposed by Protvino-ITEP group of Ammosov.

Aida
