Hi!

I just installed the new packages. Running the recotasks/demo/runMC.C gives this error:

```
===== CbmRunSim: Initialising simulation run =====
Info in <TGeoManager::TGeoManager>: Geometry CBMGeom, CBM geometry created
-I- CbmGeoMedia Read media
Loading Geant4 granular libraries ...
Error in <TUnixSystem::DynamicPathName>: libG4UIcommon[.so | .sl | .dl | .a | .dll] does not
exist in

```

Any idea?

Cheers! Sebastian.
