Hi,

Just reading the forum news. My excuses, for making life so difficult (too many events occurring at the same time... maybe I should really start using an agenda). My apologies to Ralf and Soeren!

As I discussed with Ralf via Skype.... in principle, I dont have any objections in allocating a day during the next CM for a tutorial session. I would also not mind to visit Dresden for a couple of days (always nice to get an update of the developments concerning the Frauenkirche). But seriously, there should be enough beef for a tutorial... so lets hear the others,

Best wishes,

Johan.
