Hi Sebastian,

It still doesn't work for me in TBrowser! I loaded the library using the your 'loadRecoLibs.C' then opened the browser. I can go upto:

cbmsim->Track->getMom().

As soon as I click on Mag() or px() or any variable it crashes giving the errors like: May be I'm doing something wrong.

ot [2]

*** Break *** segmentation violation

Using host libthread_db library "/lib/libthread_db.so.1".

Attaching to program: /proc/4369/exe, process 4369

Failed to read a valid object file image from memory.
