That's right. However, there are paralel sessions that almost nobody from the computing group is involved, e.g. TGT, MEC, MAG, DAT, DCS. If we put them into one morning/afternoon, we'll have another half a day for a mini-workshop.

A few weeks ago there was a plan to have a one-week workshop. This is why I assumed that 2x(half a day) will not be too much
But it's just a suggestion, let's see what the others think.

Regards,
ola
