If someone finds that, I will buy a bottle of champagne.

what I always do:

go to "Message Navigator"

newer then "3"
(i.e. messages of the last three days)

older than "0"

select

-- PandaRoot

or

-- Panda Computing
(for the grid and data challenge messages)

this is ordered in forums and sub-ordered in topics
(so maybe even more ordered than it would be in my email folder
if we got all the postings per email ...)
