Hi Christopher, I would support it too to switch the "all message notification" ON - if it is only for PandaRoot.

My argument is, that usually it is more work, if you miss an important message, than just to have to delete it in your email client. But I think it would be wise to send a short announcement (in other words, to start a new topic, so that people are alarmed, because probably not everybody followed this discussion, due to the obvious reasons ...). And then see if someone complains. We will have a PandaRoot meeting next week Wednesday, so then everyone will have a chance to state an opinion directly. And in the meantime we could - as he offered graciously - maybe blame Sebastian. cheers, -- Soeren
