Dear GSI forum community,

recently there were complaints about missed discussions due to the fact that FUDforum does not notify about all messages (some) forum participants would like to be informed about.

Anyhow there's a side-wide configuration option (i.e. can only be applied for all users and all fora) that would exactly do the desired: It will send email notifications for each new message to the forum subscribers. This does not apply to subscriptions to single topics or notifications about replies to own posts that will be handled as usual.

Anyhow there are also worries about bursting mailboxes, so here's a poll to let the GSI forum community on its own.

See <http://forum.gsi.de/index.php?t=rview&th=1869&rid=3> for the discussion so far.

The poll will be open for one month, afterwards the decision will be implemented.

Kind regards,
Christopher

All new message notification(total votes: 28)

I'd like to receive email about every new message in the fora I subscribed to. 10/(36%)
I already get enough emails and want to receive notifications only for newly started topics
I don't care 4/(14%)
