Hi

With help of Stefano, allowing me to play with his computer, i found the problem.  
His version of cmake (2.4.3.) was to old. The support for Fortran in cmake is rather new and there were many changes in recent versions. It look like the support for library versioning was introduced after cmake 2.4.3.  
The solution of the problem is to update your cmake to a newer version. The latest release is 2.4.8 which works without any problems. Also cmake 2.4.7 is fine. If other versions between 2.4.3 and 2.4.7 works i cannot test.

Ciao

Florian
