Last week I resubmitted the stt runs which failed during DC01.

The updated list of runs can be found at
http://panda-wiki.gsi.de/cgi-bin/view/Computing/DataChallenge1?CGISESSID
=ae36a554febf5c8a88370c14ed62a978#Run_list.

There are results for 24 momenta with each ~200k events. All output was again directed to
KVI.

Paul
