Hi Soeren,

Did suggestion of Stefano work for you?

I mean:
chain->AddFriend("cbmsim","simulationfile.root");
PndEmcMapper *emcMap=PndEmcMapper::Instance(1);

But it's strange that the code you posted does not access the energy of EmcCluster.
I have just checked and for me the message
"Map version 0 does not exist" is only a warning but energy is accessed.

Dima
