This works now (thanks to Dima).

The correct sequence is (load the sim file first for the map):

```
TFile* fsim = new TFile("simfile.root");
TTree *tsim=(TTree *) fsim->Get("cbmsim");
PndEmcMapper *emcMap=PndEmcMapper::Instance(1);
TChain *chain = new TChain("cbmsim");
chain->Add("recofile.root");
TClonesArray* cluster_array=new TClonesArray("PndEmcCluster");
chain->SetBranchAddress("EmcCluster",&cluster_array);
...
```
