This works now (thanks to Dima).

The correct sequence is (load the sim file first for the map):

```
TFile* fsim = new TFile("simfile.root");  
TTree *tsim=(TTree *) fsim->Get("cbmsim");  
PndEmcMapper *emcMap=PndEmcMapper::Instance(1);  
TChain *chain = new TChain("cbmsim");  
chain->Add("recofile.root");  
TClonesArray* cluster_array=new TClonesArray("PndEmcCluster");  
chain->SetBranchAddress("EmcCluster",&cluster_array);  
...
```
