Subject: GEANE backward propagation

Posted by Sebastian Neubert on Wed, 18 Jun 2008 08:07:59 GMT

Hi Lia!

I use GeaneTrackRep to do some backward propagations to extroplate Tracks back to the z-Axis / Target. A lot (>50%) of these propagations simply fail and I do not know why. I cannot see any clear pattern which tracks are affected.

Are you aware of such problems?

How can we find out why the propagation fails?

Cheers! Sebastian.
