Subject: Problems with run_sim1.C && gcc < 4.x ?

Hi everyone,

In the last week there is the run_sim1.C Macro not running on the dashboard. It looks like this is for one Dresden machine and for a GSI computer. Both have a gcc version smaller then 4.

However if I look to the logfiles (below) I don't see an explicit error...

I'm lost on this part, especially since running the pandaroot/macro/run/run_sim* scripts by hand shows everything to be ok.

Kind greetings from Dresden, Ralf.
