Hi

so far i have understood if one wants to use the new external packages one has to login at
lxetch machines at gsi, RIGHT??

and to set the simpath to this jul08 directory
/misc/cbmsoft/Etch32/jul08/fairsoft

then i try to run at macro/lhetrack/
run_sim_tpccombi.C and it works
but after trying to run run_track_tpccombi.C
i get the following error

184 Digis created
PndTpcClusterFinderTask::Exec
43 cluster created containing 184 digis from 184

```
*** Break *** segmentation violation
Using host libthread_db library "/lib/tls/i686/cmov/libthread_db.so.1".

Any idea???

ALiciaS.
