Hi Alicia

If i understand it correct you have several MC files but only one DIGI file.

Can you try the following

```
fRun->SetInputFile(inFile.Data());  
fRun->AddFriend(outFile.Data());
```

```
fRun->AddFile(inFile2.Data());  
fRun->AddFriend(outFile.Data());
```

```
fRun->AddFile(inFile3.Data());  
fRun->AddFriend(outFile.Data());
```

```
fRun->SetOutputFile(RecoFile);
```

Ciao

Florian
