TFile* fsim = new TFile("simfile.root");
TTree *tsim=(TTree *) fsim->Get("cbmsim");
PndEmcMapper *emcMap=PndEmcMapper::Instance(2);

Instead of the previous lines, you can use the much more compact form:

```
PndEmcMapper *emcMap=PndEmcMapper::Instance(2,"simfile.root");
```

which is doing exactly the same thing.
