Hi Ola,  
Actually i have the same problem as you have now.  
I solved( at the moment works) by doing the following

In the directory of genfit  
if you go to the class Track.cxx  
at the line 26  
add the line  
delete trackReps

```
Track::~~Track() {  
22  if(trackReps!=NULL){  
23    for(int i=0;i<getNumReps();i++) {  
24      delete trackReps->At(i);  
25    }  
26  delete trackReps;  }  
27  for(unsigned int i=0;i<hits.size();i++) {  
28    delete hits[i];  
29  }  
30 }
```

if you have a task to extract the information  
from the track object,  
PNDDchKalmanQATask for example

at line 150 add also fTrackarray->Delete();

i hope it works

best regards  
Alicia S.
