Hi all,

we encountered the following error while running make install, after updating the pandaroot code:

Install the project...

-- Install configuration: "Debug"

CMake Error at base/cmake_install.cmake:42 (FILE):

file INSTALL cannot find file

"/home/susanna/test_install/trunk/buildPanda/lib/libBase.so.0.0.0" to install.

Call Stack (most recent call first):

cmake_install.cmake:37 (INCLUDE)

make: *** [install] Error 1

We use cmake-2.6.

Any suggestion?

Thank you,

Susanna and Lia
