Dear colleagues,

As we discussed during our previous meetings, we were aiming to have a full - even if not final - set of DCS requirements in the database by the end of 2008. I would like to thank to the many of you who have already contributed, and I would like to appeal to the others who promised to add their contributions to do so.

The data that is already in the database is a good example of what we need to know at this point: number of channels to monitor and/or control, types of variables, subsystems etc. (limits, accuracy, alarms can be added later on). It would be great to have this before we meet at GSI in December.

Almost all of the detector liaisons have registered already and all that is left to do is take 15 minutes to input the data here:

<http://nuclear.gla.ac.uk/DCS/>

Could you please (or designate someone to) add your contribution by December 5, 2008 ?

Could heads of (sub)groups please also check the names in here ?
