Can you please explain the solution ,

I face the similar problem when running ../macro/fsim/runReco.C for more than 2000 events

```
>Error: Symbol G__exception is not defined in current scope runReco.C:180:  
>Error: type G__exception not defined FILE:../pandaroot/macro/fsim/./runReco.C LINE:180  
>*** Interpreter error recovered ***
```

Regards,
