Hello,

I found a bug (segfault) in PndTof.cxx (my current rev. 4443). On line 449 the pointer `PndGeoTofPar* par=(PndGeoTofPar*)rtdb->getContainer("PndGeoTofPar");` is created, while the class member `par` already exists (see PndTof.h, l.144). A renaming of the member variable or removing the "PndGeoTofPar*" would suffice.
I've no permission to check in.

Kind regards, Ralf.
