Hello,

I found a bug (segfault) in PndTof.cxx (my current rev. 4443). On line 449 the pointer  
PndGeoTofPar\* par=(PndGeoTofPar\*)rtdb->getContainer("PndGeoTofPar"));  
is created, while the class member par already exists (see PndTof.h, l.144). A renaming of the  
member variable or removing the "PndGeoTofPar\*" would suffice.  
I've no permission to check in.

Kind regards, Ralf.
