Hi Irina,

Small correction to your post. From the data file gammagamma.root it looks like that some single gamma clusters are split into 2 bumps not in shashlyk but in forward endcap (slightly above 2 meters in Z direction) and there is no single event with clusters in shashlyk.

And it looks like that problem is related with what Bertram posted  
[http://forum.gsi.de/index.php?t=rview&goto=7833#msg\\_7833](http://forum.gsi.de/index.php?t=rview&goto=7833#msg_7833)

I tried to solve it but still without success.

Dima
