Subject: Re: correction in emc bump splitting Posted by Dima Melnychuk on Fri, 06 Feb 2009 12:46:26 GMT View Forum Message <> Reply to Message

Hi Irina,

Small correction to your post. From the data file gammagamma.root it looks like that some single gamma clusters are split into 2 bumps not in shashlyk but in forward endcap (slightly above 2 meters in Z direction) and there is no single event with clusters in shashlyk.

And it looks like that problem is related with what Bertram posted http://forum.gsi.de/index.php?t=rview&goto=7833#msg_7833

I tried to solve it but still without success.

Dima
