Dear colleagues,

On Wednesday 11.02.09 we will close the read and write access to FairRoot/CbmRoot/PandaRoot repository, So that we can rename the base classes and update the Runime Data Base, this should take one or two days, during these two days:

1. All code in the SVN will be adapted to these changes
2. All ASCII Parameter will be also adapted

After these changes, we will lose the backward compatibility to the ROOT files already produce. However old files can still be used with the old releases!

Please synchronize your development code with the trunk before Wednesday. Otherwise you will have to merge the changes yourself!

Regards

Mohammad
