Dear colleagues,

I have written doxygen documentation for all major genfit classes.
This interactive documentation is available at:
http://cbmroot.gsi.de/panda_doc/daily/html/group__genfit.html

It contains descriptions of all available methods, background information on the classes and inheritance diagrams.

In the next weeks Christian will clean up the code. A few methods will therefore disappear. The latest version of the documentation will be created automatically every night.

Please have a look and give me your feedback what you are missing or what is usefull to you.

Best Regards, Sebastian.
