Subject: Re: WirepointHitPolicy detplane implementation
Posted by Lia Lavezzi on Fri, 20 Mar 2009 11:58:41 GMT

Hi,
  I just uploaded the GeaneTrackRep with the implemented extrapolateToLine: now the dirInPoca is empty.

I also changed the PndSttRecoHit in order to use this function (I know the detPlane determination will be moved to the WirepointHitPolicy, but I wanted to test it) and I obtain the same results I got before, so it seems to work

I will think about the dirInPoint...

                    Ciao,
                     Lia.
