Hi Vjha,

i think you should  
add your digi/reco output file(infile)  
after having added the corresponding simfile  
so like that,

```
FairRunAna *fRunA= new FairRunAna();  
fRunA->SetInputFile(simfile); // your simulation file  
fRunA->AddFriend(infile); // your reco/digi output file  
fRunA->AddFile(simfile1);  
fRunA->AddFriend(infile); // your reco/digi output file  
fRunA->AddFile(simfile2);  
fRunA->AddFriend(infile); // your reco/digi output file  
  
fRunA->SetOutputFile(outfile.Data()); //your microcandidates output file
```

I have modified the writeMicro so that you can try now again.  
tell me it is working.

best regards  
alicia
