Hi Felix,

maybe this is helpful (or maybe not): I got this error too and as far as I understand it is connected with writing the `std::vector< std::map<int,int>* > failedHits` to file, since I could avoid this error just by adding the `//!` to this line in `Track.h`:

```
std::vector< std::map<int,int>* > failedHits; //!
```

Obviously if we need the `failedHits` in the file this is not a solution

Ciao,
Lia.
