Hello Sugat,

To me it looks like you are missing a parameter file which your macro tries to load:

Quote:Cross section calculation concluded successfully

-I- FairMCApplication:: Monte carlo Engine Initialisation with TGeant3TGeo

I- FairGeane::FairGeane: Geane is Initialized

-E- Could not open input file /home/sugat/panda/pandaroot_may09/emc/emc.par

Fatal in <FairParAsciiFileIo::open>: Could not open input file

aborting

Attaching to program: /proc/6091/exe, process 6091

[Thread debugging using libthread_db enabled]

I think the emc parameter file can be found in pandaroot/macro/params/emc.par.

Kind regards, Ralf.

PS:

Maybe it is good if you check your source code status with

pandaroot_may09> svn info

and

pandaroot_may09> svn status

It might be that you got some file conflicts with your update.
