Subject: Re: Error while using runReco.C Posted by Ralf Kliemt on Mon, 04 May 2009 07:42:22 GMT View Forum Message <> Reply to Message

Hello Sugat,

To me it looks like you are missing a parameter file which your macro tries to load: Quote:Cross section calculation concluded successfully -I- FairMCApplication:: Monte carlo Engine Initialisation with TGeant3TGeo I- FairGeane::FairGeane: Geane is Initialized -E- Could not open input file /home/sugat/panda/pandaroot\_may09/emc/emc.par Fatal in <FairParAsciiFileIo::open>: Could not open input file aborting Attaching to program: /proc/6091/exe, process 6091 [Thread debugging using libthread\_db enabled]

I think the emc parameter file can be found in pandaroot/macro/params/emc.par.

Kind regards, Ralf.

PS: Maybe it is good if you check your source code status with pandaroot\_may09> svn info and pandaroot\_may09> svn status It might be that you got some file conflicts with your update.
