Hi,

I will have a look to the macros you attached as soon as possible (sorry but these are very busy weeks...).

In PndSttTrackFinderIdeal just a match of the hits to the track, starting from the MC truth, is made, so no cut should be there, but I will check it more deeply what causes the problem.

Sorry for not being more detailed here, but I need to test directly the code to understand what happens.

I will keep you informed!

Best regards,
Lia.
