Subject: Re: Drift CHamber in forward spectrometer Posted by Aleksandra Wronska on Tue, 26 May 2009 10:47:12 GMT View Forum Message <> Reply to Message

Hi again,

you probably draw MCPoints from all detectors in one picture. Indeed, what you see at (0,0) is a beam pipe hole on the first chamber. The image of it on the detectors further downstream goes towards right because of the tracks deflection in the magnetic field.

cheers, ola
