Dear Radek,

When I study on the FS tracking, the reconstruction have been done GEM and DCH alone, separately.

I can well understand what we have to do, what we need to do in the future.

Please don't be stress. I always thank you for your great efforts, specially GEM tracking and combined forward tracking.

If I don't have this kind of useful helps, I cannot succeed all study in time, forever.

I will wait good news on the GEM.

I think that it is also great to discuss ideas with you, continueously.

Have a good day!

Donghee Kang
