Hello,

Sophie mentioned in the Hypernews that /d/panda02 is 100% filled up and that she and Eric could not work anymore.

I post this issue to a broader audience and would like to ask the top users (above 100 GB, list below) to move/remove some data.

In general we should think about how to distribute the user's data among the different /d/pandaXX file systems. Any input is welcome.

Best regards,

Marc
