Hi,

indeed, one can observe the shift of about 0.155 degree
and 0.144 degree, for GEANT 3 and GEANT 4, respectively.
In fact, there is a shift, but it is very small.

Besides, I added to ../trunk/macro/emc/
2 macros I used to obtain plots I posted last days.

Names are:

anal_point_fwendcap.C

anal_hit_digi_cluster_fwendcap.C

Regards,
Ola.
