Subject: Re: forward endcap quest goes on Posted by Aleksandra Biegun on Thu, 09 Jul 2009 13:43:43 GMT View Forum Message <> Reply to Message

Hi,

indeed, one can observe the shift of about 0.155 degree and 0.144 degree, for GEANT 3 and GEANT 4, respectively. In fact, there is a shift, but it is very small.

Besides, I added to ../trunk/macro/emc/ 2 macros I used to obtain plots I posted last days. Names are: anal_point_fwendcap.C anal_hit_digi_cluster_fwendcap.C

Regards, Ola.
