Subject: Rate capability of DCH tracker Posted by donghee on Thu, 23 Jul 2009 10:01:15 GMT View Forum Message <> Reply to Message

Hi DCH experts,

I have one question for DCH tracker. How do you expect the rate capability of DCH? I think that drift chamber is limited by the small anlge scattering on the chamber wires and gas and also it would have some limitation by cetain size of multiplicity.

Where can I find the detail Article and design of DCH? In wiki, I couldn't find a detail info.

Thank you
