Hi all,

I use pandaroot revision 6087. when i use PndMicroWriter task with the writemicro.c in /macro/fsim and then run ana_lambda.C there are no entries in the plot. in the browser of PndMicroWriter no ChargeCandidates and neutralCandidates are written, but microcandidates are not empty.

Anybody knows whether PndMicroWriter task works in this revision correctly? i checked ana_lambda.C works correctly.

Any idea what's going wrong?

thanks,leila
