Subject: List of publications on data reconstruction in HEP experiments
Posted by Ivan Kisel on Fri, 17 Sep 2004 07:34:04 GMT

Dear friends,

I have created a www page with copies of publications on data reconstruction in HEP experiments:

http://www-linux.gsi.de/~ikisel/reco/

Currently there are ARES, CLEO, H1, HERA-B, LHCb and NEMO experiments there. You can download the publications, which are stored in pdf or ps formats.

I know most of them quite well, thus we can discuss interesting topics. Another option is to make overviews of these or other experiments or methods.

Ivan.
