The test installation under http://lxdv12.gsi.de/FUDforum2/index.php seems to have now rather strange access rules to the one and only forum called 'TestForum'.

If not logged in, I see the 'TestForum' forum, and can read the topics and posts:

If I login as user 'mueller', the 'TestForum' forum is not longer visible, the test system is essentially useless when I'm logged on:

That got probably screwed up during the upgrade, because I had posted 5 messages before the recent upgrades were done.
